

MALINDA RATHNAYAKA

Software Engineering Intern

0767228242 | <mailto:rathnayakamalinda14@gmail.com> | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Detail-oriented Information Technology undergraduate with hands-on experience across Java application development, the MERN stack, and Android development, currently strengthening backend skills through Spring Boot and REST API design. Brings one year of technical experience as a Computer Technician, with strong analytical and troubleshooting abilities. Seeking a Software Engineering internship to contribute to scalable backend and full-stack development projects.

TECHNICAL SKILLS

Languages: Java, JavaScript, Kotlin, SQL, HTML, CSS

Frameworks & Technologies: Spring Boot (Learning), MERN Stack (MongoDB, Express.js, React.js, Node.js), MVC Architecture, Android Development, Tailwind CSS, Bootstrap

Databases: MySQL, MongoDB, MongoDB Atlas, Oracle SQL, H2

Tools: Git, GitHub, IntelliJ IDEA, VS Code, Eclipse, Postman, Oracle SQL Plus, Android Studio

Concepts: RESTful API Design, CRUD Operations, OOP, Full-Stack Development, State Management (Redux)

PROJECTS

Smart University System | *React, Node.js, Express.js, MongoDB, Vite* | [GitHub](#)

- Built a full-stack university services platform (auth, canteen, library, shuttle, facilities) with a modular Express/MongoDB backend and a React (Vite) frontend.
- Designed RESTful API routes/controllers per service domain using Mongoose models, with reusable React components on the frontend.

MERN State | *MongoDB, Express.js, React.js, Node.js, Tailwind CSS* | [GitHub](#)

- Built a full-stack real estate listing application on the MERN stack, with a Node.js/Express + MongoDB backend and a Tailwind-styled React frontend.

Tourvana | *Node.js, Express.js, MongoDB, React.js* | [GitHub](#)

- Contributed to a multi-service booking platform (food, hotel, event, tour providers) with a Node.js/Express backend and React frontend.
- Implemented a unified search API endpoint surfacing both items and provider profiles, using MongoDB queries and population of related data.

Staff Management System | *Java, MVC Architecture, MySQL, HTML, JavaScript, Bootstrap* | [GitHub](#)

- Built a staff management module for a School Information System using Java and layered MVC design (UI, business logic, database) with MySQL and CRUD operations.

Vehicle Rental Mobile Application | *Kotlin, Android Studio, Gradle* | [GitHub](#)

- Developed a native Android vehicle rental application in Kotlin with structured UI, navigation, and core mobile development principles.

Student Management System (Java) — CRUD system built with OOP principles. | **Mos Burger Web App** — CRUD web system (HTML/CSS/JS) with client-side validation.

WORK EXPERIENCE

Computer Technician — 1 Year Experience

- Diagnosed and resolved hardware and software issues across desktop and laptop systems.
- Installed and configured operating systems and business applications.
- Provided technical troubleshooting and end-user support, building strong analytical and problem-solving skills.

EDUCATION

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT) | Expected Graduation: 2026

GCE A/L — Commerce with Information Technology

R/Ananda Maithreya Central College

PROFESSIONAL DEVELOPMENT

- Full Stack Development — University of Moratuwa (Ongoing)
- Certificate Course — ICET Institute (Ongoing)
- English Certificate — University of Sabaragamuwa (Completed)

Currently Learning: Spring Boot, REST API Development, Backend Architecture
